

2N IP Phone D7A

Manufacturer: 2N

Reference: H1120102

Price: 559,02€

Description:

Any modern building, residential or commercial, needs a smart IP phone that allows the receptionist to answer calls from the IP intercom at their front entrance. Preview the person waiting via the IP intercoms camera on the built in 7" touchscreen display, and open the door at the mere touch of a button. What's more, it's equipped with Android OS, which allows apps such as Skype or Zoom to be installed on the phone for video calling whenever needed. The 2N[®] IP Phone D7A is not covered by free cloud calling within My2N.

You only need one UTP cable for communication and power supply. If that doesn't work for you, you can connect the phone to the network via Wi-Fi. Setting up calls is easy, too - you can do it within 3 minutes. Simply use our [quick guide](#), [datasheet](#) or a complete [user manual](#) to help you.

Order optional accessories and enhance the potential of the 2N[®] IP Phone D7A.

USB camera for the 2N[®] IP Phone D7A (Order No. 1120105) - simply connect the camera and add a two-way video function, for example with the 2N[®] IP Style intercom.
