

> Freeware 2N® IP eye - Pop-up video on call - Administration of multiple cameras

The 2N® Helios IP Eye is a freely available application that not only performs the job of a videophone, but also provides video surveillance at your entrance.

Manufacturer: 2N Helios IP

Reference:Freeware

Description:

Video without a video telephone

The 2N® Helios IP Eye is a freely available application that not only performs the job of a videophone, but also provides video surveillance at your entrance.

All you need is a door intercom with a camera and you can have audio and video without the need for a videophone. When someone rings the bell, a video window pops up automatically and you can immediately see who is standing at the door. You can also unlock the door or turn on the light, directly from the application window. Of course, you can also have video display without audio, and from several intercom units at the once.
