

Integrated badge reader card for Helios IP

Integrated badge reader card for Helios IP, delivered with 10 badges type cc or keyfobs

Manufacturer: 2N Helios IP

Reference: H9137430

Price: 150,04€

Description:

Optional card reader

The optional card reader module facilitates the use of RFID cards for 2N® Helios IP lock and switch control. Connect the module to any 2N® Helios IP recent version and configure the system easily using the web interface.

Moreover, the module contains two additional switches and universal digital inputs and outputs for user applications (open door control, light activation).

2N® Helios IP with an additional card reader module can be used as a stand-alone system or integrated in your existing security system equipped with a Wiegand or RS-485 interface.

Capacity : 10 general badges and 90 badges linked with logged users

Features :

- RFID technology 125kHz - EM4100/4102
- 2 additional switches
- Digital inputs and outputs
- Wiegand/RS-485 interface
- Web configuration
- Time profiles for cards (Pro licence on Helios IP required)

Benefits:

- Simple solution for comfortable and secure entry
- Higher security level
- Up to 4 switches (Pro licence on Helios IP required)
- Entrance monitoring
- All functions in one system
- Integration with security systems

Target groups:

- Offices and office buildings
 - Residential areas, apartment buildings, suburban settlements
 - Parking places
 - Detention centres
 - Schools
- ... any facilities where a secure and simple door control is needed
